

# *Gas Network Innovation Competition Full Submission*

## *Supplementary Answer Form*

**Project:** \_\_\_\_\_

Tick if this answer has been provided verbally: ☐

Project code	NGGTGN03	Question Number	23
Question date	15/09/2015	Answer date	17/09/2015
Submission section question relates to	g) Robust methodology/ready to implement		
Topic	SDRCs		
Question	Please can you clarify what the first bullet point for SDRC 9.3 means?		
Notes on question			
Answer	<p>The wording against the first bullet point of SDRC 9.3 may be misrepresentative. This could in fact be worded 'Existing site as-built data classified and pegged with supplementary data'.</p> <p>In order to make the customer Visual Online Portal as effective and efficient as possible we will have to develop a database of all the existing site data, identifying and recording key attributes to each site. This will involve a survey of the site to acquire certain key parameters, i.e. is there currently a power supply? Is there available space on site? Are there any obstacles preventing a vehicle accessing the site?</p> <p>This information recorded will be incorporated into an 'existing site information' database which will be utilised to determine what option(s) best suit the customer based on the input parameters.</p>
