

Gas Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Real-Time Networks

Tick if this answer has been provided verbally: ☐

Project code	SGN_GN_03	Question Number	15
Question date	10 Sep 2015	Answer date	14 Sep 2015
Submission section question relates to	N/A		
Topic	Smart meters		
Question	Please could you provide additional information on how the project will allow/enable the integration of smart meter data (i) during the project if available and (ii) after the project.		
Notes on question	NIC criterion b) Value for money		
Answer	<p>Relevant smart meter data obtained during or after the project can be incorporated into the Real-Time Networks solution. This data can be fed into the real-time gateway and integrated into the Real-Time Networks solution. How this would be integrated has been included in the IT project plan included in the submission appendix (Appendix 3, Fig 3.1 "Cloud Solution IT Architecture").</p> <p>If smart meter data were available only after the project, the demand model could be further refined post project; subject to the quality and the relevance of this data.</p> <p>We have commented further on the availability and issues surrounding obtaining smart meter data in the responses to questions 16 to 18.</p>
