

Response to Ofgem's consultation, 'Proposals for DCC's role in developing a Centralised Registration Service and penalty interest proposals'.

Response by Tempus Energy

Sent by email, 22 January 2016

Dear Ms. Bradney,

I am writing to you in response to the open consultation Ofgem published on the DCC's role in developing a CRS. I just wanted to send a brief email on behalf of Tempus Energy Supply Ltd essentially supporting Ofgem's work and proposals on including additional requirements in the DCC's licence to enable faster switching. Faster switching can only be considered a positive development for the GB retail energy market. Consequently, it is only reasonable that the DCC be allowed to recover those additional costs.

Best wishes,

Andreas Formosa
