

Energy Company Obligation

Monthly Update

28 July 2016

Issue 13

Dear Stakeholder

Welcome to Issue 13 of our new Energy Company Obligation (ECO) newsletter.

In this month's issue we include regular items such as our online progress reports, and the government's latest ECO statistics.

We also link to our new blog on deemed scores, and the recent ECO2 guidance note on determining whether premises are domestic premises. Finally, we highlight our latest quarterly monitoring report.

We hope you find our newsletter useful. We'd value your feedback, so feel free to [contact the ECO Team](#) with any suggestions on how we can improve it.

About ECO

ECO is a government scheme to reduce carbon dioxide emissions from Britain's domestic housing and support people living in fuel poverty by funding energy efficiency improvements.

It places legal obligations on larger energy suppliers to deliver energy efficiency measures to domestic premises in Great Britain. The scheme began in 2013, and the overall obligation period for the second phase of ECO (ECO2) runs from 1 April 2015 to 31 March 2017.

Ofgem E-Serve is the administrator of ECO while BEIS is responsible for the policy.
