

Schedule 4C - Summary of February Consultation responses on proposed modifications to the special conditions of the electricity transmission licence held by NGET

Existing Special Condition 3B: Calculation of allowed pass through items

Respondent	Ref	Comments	Suggested alternative drafting (tracked changes represent suggested changes)	Ofgem view
InterGen (UK) Ltd	Page 9/10	We don't think it is in the consumer interest to support Interconnectors via the cap and floor regime, and disagree that the interconnector, via NGET, should have the ability to pass on floor costs via TNUoS charges, therefore we object to this amendment to the licence.	Not provided	The decision to grant Nemo Link a cap and floor regime (of which the mechanism linking to TNUoS charges is an integral part) was taken after extensive policy consultation. The licence change process cannot be used to reverse or change this decision.
