

FIT Deployment caps that have been reached in tariff period 01 (08 February – 31 March 2016) as at 00:00 on 15 March 2016

Please be aware the following tables do not consist of real-time information. They are updated on a weekly basis. The information for each tariff period is verified once the tariff period has ended, which means these figures may change when the report for the entire tariff period is published.

The table below lists the deployment caps that have been reached so far in the current tariff period and records the date and time of the last installations to gain entry under those caps. Installations that are dated and timed afterwards will be queued for entry into the next available deployment cap.
