Proposal summary (short summary, suitable for published description on our website)

Requirement for the Delivery Body to respond within a specified period following notification of Satisfactory Performance Days.

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

13.4.2 does not require the Delivery Body to notify a Capacity Provider that any Satisfactory Performance Day has not been properly notified. It is proposed that any such notification by the Delivery Body should be made within five working days of receiving the notification from a Capacity Provider.

Description of the issue that the change proposal seeks to address:

Without an assurance that notifications of Satisfactory Delivery Days to the Delivery Body will be responded to in a timely way, a Capacity Provider risks not being able to correct a notification during the Winter when they are obliged to demonstrate their De-rated Capacity.

If applicable, please state the proposed revised drafting (please highlight the change):

In Rule 13.4.2 add “within five Working Days” so that it reads “The Delivery Body must notify the Capacity Provider within five working days...”

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

Without timely responses to notifications of Satisfactory Performance Days, Capacity Providers will not be certain that they have delivered their obligations to demonstrate their De-rated Capacity and therefore will risk interruptions to capacity payments.
