

Dear Ofgem

We have reviewed the ECO2t consultation part 2 and our responses are below:

- Do you agree that an LA declaration should be dated prior to the date of the installation of the measure?
 - Yes on the proviso that an LA is able to evidence version control to enable suppliers to check install dates against previous statements of intent (SOI) where SOI's have been updated
- Do you agree with our proposed administration of SWI in-fill?
 - Yes.
 - Our understanding is that there is an error in the draft guidance on page 15 section 3.1i, should have an 'or' at the end of the sentence
 - We would appreciate it being made clear that this is for private domestic premises only and that it does not include help to heat benefit eligible customers if that is BEIS' intention
- Do you agree with our proposed administration of evidencing that the Local Authority has published a statement of intent and that it includes the minimum required information?
 - Yes, although we would appreciate confirmation from Ofgem that suppliers will not lose measures retrospectively if it is found LA's are acting improperly

If you have any queries relating to this please contact Dave Nutt (david.nutt@edfenergy.com)

Kind Regards
