**Gas Act 1986
Section 23(2)**

Notice of statutory consultation on a proposal to modify the gas standard special conditions: part A

1. The Gas and Electricity Markets Authority ('the Authority')¹ proposes to modify the standard special condition: part A held by each of the above licensees granted or treated as granted under section 7 of the Gas Act 1986 by inserting Standard Special Condition A28 (Gas Network Innovation Strategy).
2. We are proposing this modification to implement our policy decision made on 31 March 2017 to require network operators regulated through the Revenue=Incentives + Innovation + Outputs (RIIO) price control framework to collaborate on the development of a Gas Network Innovation Strategy.²
3. The effect of this modification is to require the affected licensees to work together to develop and consult with stakeholders on a Gas Network Innovation Strategy. Licensees will be required to develop a plan by 31 August 2017 and complete the initial strategy by 31 March 2018. The deadline for the plan is one month later than the date stated in our Network Innovation Review policy decision. We've made this change because of stakeholder feedback that there will be competing demands on the network companies to meet other obligations by 31 July 2017.
4. The proposed modification to part A of the gas standard special licence conditions is set out in the Appendix to this notice. A copy of the proposed modification and other documents referred to in this Notice have been published on our website (www.ofgem.gov.uk). Alternatively they are available from our Research and Information Centre, 9 Millbank, London, SW1P 3GE (020 7901 7003).
4. Any representations with respect to the proposed licence modification must be made on or before 8 June 2017 to: Anna Kulhavy, Office of Gas and Electricity Markets, 9 Millbank, London, SW1P 3GE or by email to anna.kulhavy@ofgem.gov.uk.
5. We normally publish all responses on our website. However, if you do not wish your response to be made public then please clearly mark it as not for publication. We prefer to receive responses in an electronic form so they can be placed easily on our website.
6. If we decide to make the proposed modification it will take effect not less than 56 days after the decision is published.

.....
Geoffrey Randall
Duly authorised on behalf of the
Gas and Electricity Markets Authority

11 May 2017

Appendix – Draft standard special licence condition A28 to be inserted into the gas Standard Special Conditions: Part A

Condition A28. Gas Network Innovation Strategy

Introduction

A28.1. The purpose of this condition is to set an obligation on the licensee to work with other parties to develop a Gas Network Innovation Strategy. This requirement is intended to ensure that Relevant Network Licensees take a joined up approach to innovation, which results in coordinated action on priority areas that offer significant potential benefit, shared learning and the minimising of unnecessary duplication.

A28.2. This condition does not prevent the licensee from undertaking Innovation Projects that are not specifically outlined within the Gas Network Innovation Strategy.

Part A: Requirement to create and maintain a Gas Network Innovation Strategy

A28.3. The licensee must develop and maintain a Gas Network Innovation Strategy and must use reasonable endeavours to cooperate with all other Relevant Network Licensees in the development of the Gas Network Innovation Strategy .

A28.4. The Relevant Network Licensees must prepare a plan for the development of the first Gas Network Innovation Strategy by 31 August 2017. The first Gas Network Innovation Strategy must be published by 31 March 2018.

A28.5. The licensee must use all reasonable endeavours to work with all other Relevant Network Licensees to ensure the Gas Network Innovation Strategy is reviewed every two years and where necessary, in the majority view of Relevant Network Licensees, is also updated.

Part B: Gas Network Innovation Strategy

A28.6. The Gas Network Innovation Strategy must:

- (a) set out the procedures for updating it (which must include the requirement to consult with Interested Parties in accordance with Part C below and the biennial review referred to in paragraph A28.5);
- (b) be kept up to date in accordance with the procedures referred to in paragraph A28.6(a); and
- (c) be readily accessible to the public from the licensee’s Website.

A28.7. The Gas Network Innovation Strategy must include:

- (a) a description of the challenges and uncertainties which the Relevant Network Licensees consider are pertinent to the gas network over different time periods-that could be addressed through innovative projects;
- (b) a description of the challenges which are not currently being addressed through projects or plans, including but not limited to projects or plans made by the Relevant Network Licensees and Interested Parties;

- (c) a description of the innovative projects and plans the Relevant Network Licensees intend to make in order to address the challenges referred to in paragraph A28.7(a) of this condition, with particular regard to how future Innovation Projects which Relevant Network Licensees will seek to initiate over the period of the strategy will help to address those challenges;
- (d) a description of the innovative projects and plans the Relevant Network Licensees intend to make in relation to the gaps identified in paragraph A28.7(b) of this condition, with particular regard to how future Innovation Projects which Relevant Network Licensees will seek to initiate over the period of the strategy will help to address those gaps. Consideration should be given to the suitability of the Relevant Network Licensees to carry out the innovative projects and plans. If the Relevant Network Licensees do not intend to carry out innovative projects and plans relating to a gap identified in paragraph A28.7(b), a reason should be provided as part of this description;
- (e) a description of how Relevant Network Licensees will coordinate their activities on Innovation Projects to minimise unnecessary duplication of effort;
- (f) a description of how Relevant Network Licensees will share the learning that they have gained through Innovation Projects; and
- (g) any directions related to the Gas Network Innovation Strategy issued by the Authority.

Part C: Consultation

A28.8. The licensee must consult Interested Parties prior to publication, or revision, of the Gas Network Innovation Strategy in cooperation with Relevant Network Licensees and must include a consideration of any representations received in response to the consultation within the Gas Network Innovation Strategy.

Part D: Interpretation

A28.9. For the purposes of this condition:

Gas Network Innovation Strategy	means a document published by Relevant Network Licensees that complies with the requirements of this condition.
Innovation Project	means a project funded by the Network Innovation Competition or the Network Innovation Allowance as established by Special Conditions 1H and 1I of the Gas Transporter Licence; Special Conditions 2E and 2F of the Gas Transporter (NTS) Licence.
Interested Parties	interested parties include, but are not limited to, the Engineering and Physical Sciences Research Council, the Department of Business, Energy and Industrial Strategy, Innovate UK and their successor bodies and

Relevant Network Licensee

holders of a Gas Transporter Licence not regulated through the RIIO model.

means the holder of a Gas Transporter Licence with condition A28 in effect in its licence.
