

Question		Response																																				
About you and your work																																						
1. What is the name of your company?		Roadnight Taylor Ltd																																				
2. Which DNO’s ICE submission is your response related to (see Annex 2 for DNO map)? Please indicate clearly in your response to the questions below whether your comments refer to the DNO’s plans as a whole, or to one of the DNO’s licence areas. If you wish to provide a response to the ICE submission of more than one DNO, please use a separate template for each DNO.		Electricity North West																																				
3. What type of connection do you generally require? And for each type of connection, how many connection applications, including total MVA (Mega Volt Ampere) of connections have you made in the past year? Please note that we will assess storage within the relevant metered generation market segment. Note: These figures are estimated, are aggregated across all DNOs and may include multiple, linked applications per site		<table><tr><th colspan="2">Type of connection</th><th>Total number of connections</th><th>Total MVA of connections</th></tr><tr><td rowspan="4">Metered Demand Connections</td><td>Low Voltage (LV) Work</td><td></td><td></td></tr><tr><td>High Voltage (HV) Work</td><td></td><td></td></tr><tr><td>HV and Extra High Voltage (EHV) Work</td><td></td><td></td></tr><tr><td>EHV work and above</td><td></td><td></td></tr><tr><td rowspan="2">Metered Distributed Generation (DG)</td><td>LV work</td><td>5</td><td>0.5</td></tr><tr><td>HV and EHV work</td><td>80</td><td>1,500</td></tr><tr><td rowspan="3">Unmetered Connections</td><td>Local Authority (LA) work</td><td></td><td></td></tr><tr><td>Private finance initiatives (PFI) Work</td><td></td><td></td></tr><tr><td>Other work</td><td></td><td></td></tr></table>			Type of connection		Total number of connections	Total MVA of connections	Metered Demand Connections	Low Voltage (LV) Work			High Voltage (HV) Work			HV and Extra High Voltage (EHV) Work			EHV work and above			Metered Distributed Generation (DG)	LV work	5	0.5	HV and EHV work	80	1,500	Unmetered Connections	Local Authority (LA) work			Private finance initiatives (PFI) Work			Other work		
Type of connection		Total number of connections	Total MVA of connections																																			
Metered Demand Connections	Low Voltage (LV) Work																																					
	High Voltage (HV) Work																																					
	HV and Extra High Voltage (EHV) Work																																					
	EHV work and above																																					
Metered Distributed Generation (DG)	LV work	5	0.5																																			
	HV and EHV work	80	1,500																																			
Unmetered Connections	Local Authority (LA) work																																					
	Private finance initiatives (PFI) Work																																					
	Other work																																					

Consultation questions	
Section 1: Looking Back report 2016-17	
We want your views on how well the DNOs have performed over the last year	
1. Are you satisfied that the DNO had a comprehensive and robust strategy for engaging with connections stakeholders? Do you consider that the DNO implemented its strategy? If not, are you satisfied that the DNO has provided a reasonable and well-justified explanation?	Having only recently started operating in this licence area we are relatively new to ENW but have found them keen to engage at all levels of the business (if arguably a little light on numbers in the connections team). The first Customer Connections Steering Group we have participated in was positive and genuine, we fully expect this to continue and that we will see improvements through the coming year.
2. Are you satisfied that the DNO had a comprehensive work plan of activities (with associated delivery dates) to meet the requirements of its connections stakeholders? Do you consider that the DNO delivered its work plan? If not, are you satisfied that the DNO has provided a reasonable and well-justified explanation?	We are not qualified to comment on this in the current year.
3. Do you consider that the DNO's work plan provided relevant outputs (eg key performance indicators, targets etc.)? Are you satisfied that the DNO has delivered these outputs? If not, do you view the reasons provided to be reasonable and well justified?	We are not qualified to comment on this in the current year.
4. Do you agree that the DNO's strategy, activities and outputs have taken into account ongoing feedback from a broad and inclusive range of connections stakeholders? If not, has the DNO provided reasonable justification?	We are not qualified to comment on this in the current year.
The following two questions refer to the specific areas we discuss in our letter – meeting the needs of all types of connections customers, and connecting when the networks are constrained.	

5. Do you consider that the DNO's activities and outputs over the past year were adequate in meeting the needs of all types of connection customers, including the particular needs of newer types of connection customers?	We are not qualified to comment on this in the current year.
6. Do you consider that the DNO's activities and outputs over the past year were adequate in meeting the needs of customers looking to connect when the networks are constrained?	We are not qualified to comment on this in the current year.
<p style="text-align: center;">Section 2: Looking Forward plans 2017-18</p>	
<p>We want your views on what the DNOs aim to achieve in the coming year</p>	
7. Are you satisfied that the DNO has a comprehensive and robust strategy for engaging with connection stakeholders and facilitating joint discussions where appropriate?	The 2017-18 workp plan would suggest that ENW has a strategy for this, although arguably not as comprehensive, deep and involved as some others.
8. Do you agree that the DNO has a comprehensive work plan of activities (with associated delivery dates) that will meet the requirements of its connection stakeholders? If not, has the DNO provided reasonable and well-justified reasons? What other activities should the DNOs do?	The 2017-18 workplan is unarguably light, but the plan itself can be a springboard for increasing the breadth, depth and detail of objectives/outputs over the coming year. I would be surprised, and disappointed, if this year's engagement activities didn't provide a greater number of actions for the future.
9. Do you consider that the DNO has set relevant outputs that it will deliver during the regulatory year (eg key performance indicators, targets, etc.)?	They are not irrelevant.
10. Would you agree that the DNO's proposed strategy, activities and outputs have been informed and endorsed by a broad and	We are not qualified to comment on this in the current year.

<p>inclusive range of connection stakeholders? If they have not been endorsed, has the DNO provided robust evidence that it has pursued this?</p>	
<p>The following two questions refer to the specific areas we discuss in our letter – meeting the needs of all types of connections customers, and connecting when the networks are constrained.</p>	
<p>11. Do you consider that the DNO's planned activities and outputs will be sufficient to meet the needs of all types of connection customers, including the particular needs of newer types of connection customers? What other activities should the DNO undertake in this area?</p>	<p>Given that ENW publishes separate workplans, and we have focussed our attention on the DG workplan only, we are un-qualified to answer this question.</p>
<p>12. Do you consider that the DNO's planned activities and outputs will be sufficient to meet the needs of customers looking to connect when the networks are constrained? What other activities should the DNO undertake in this area?</p>	<p>We have not yet discussed flexible connection opportunities with ENW in any great depth, and so cannot comment on this from a direct experience standpoint – however, whilst there is little in the plan on this score, we are interested in the new concept of VPNs, and ENW has broken ground ahead of others in this area.</p>

Annex 2 - Map showing DNO licensee areas¹

Electricity Distribution
