Dear Amanda,

Notice of consultation to modify conditions of the transmission licence proposed to be granted to the successful bidder for the Dudgeon OFTO project

We have today commenced a consultation under section 8A of the Electricity Act 1989 on the proposed modifications to certain standard conditions of the transmission licence that may be granted to TC Dudgeon OFTO plc (the **Potential Licensee**). The transmission licence will be granted to the Potential Licensee if Transmission Capital Partners (a consortium of Transmission Capital Partners and International Public Partnerships Limited) (the **Preferred Bidder**) becomes the successful bidder for the Dudgeon OFTO project (the **Project**).

The attached consultation notice is published on our website and sets out details of the proposed modifications, the closing date of the consultation and how to respond. We have posted hard copies to you as well as the Company Secretary of the Potential Licensee.

We are proposing to add a number of amended standard conditions to the transmission licence that may be granted to the Potential Licensee should the Preferred Bidder become the successful bidder for the Project. These proposed conditions are annexed to the section 8A notice.

In accordance with our statutory requirements and best practice we have brought the proposed modifications to the attention of persons likely to be affected and also provided copies of the notice to:

- Secretary of State for Business, Energy and Industrial Strategy;
- Citizens Advice;
- The Health and Safety Executive (HSE);
- The Scottish Executive;
- The Welsh Assembly; and
- The Project Developer (Dudgeon Offshore Wind Limited).

Project specific Licence modifications

Amended Standard Condition E12-J3 (Restriction of Transmission Revenue: Allowed Pass-through Items)

We have added a pass through mechanism (the **contingent event revenue adjustment** or **CEA**) to amended standard condition E12-J3 (Restriction of Transmission Revenue: Allowed Pass-through Items) (**E12-J3**).

The CEA mechanism is a bespoke pass through item for this licence. It allows the Authority to adjust the Potential Licensee's revenue entitlement should costs and/or expenses arise in the event that the licensee has been required by the Secretary of State to increase the size of its security in respect of its decommissioning programme:

- i) to account for the payment of VAT, and/or
- ii) as a result of the disallowance of scrap value of certain decommissioned assets.

The offshore regime incentivises licensees to manage costs efficiently over a 20-year period but also recognises that licensees may not be best placed to manage risks where they are not sufficiently within their control. There are therefore a number of pre-defined revenue adjustment mechanisms in the licence that seek to optimally reallocate risk for a small number of known, but unpredictable, factors.

The Authority considers that the most appropriate way of providing the Potential Licensee with a method to recoup costs and/or expenses (as the case may be) resulting from the contingent events in connection with this Project, is by including a CEA term in the licence. The use of such a licence adjustment mechanism is necessary in this case for the following reasons:

1. the Preferred Bidder was not aware (and could not reasonably be expected to have been aware) of either the contingent event and/or the materiality of the relevant contingent event (as the case may be) prior to and for the purposes of submitting its Invitation to Tender (**ITT**) submission;
2. it has not been possible for the Preferred Bidder to resolve or fully mitigate the contingent events by way of commercial agreement with relevant parties or by any other mechanism which would provide an appropriate solution; and
3. the contingent events are both contingent and material, in that:
 - (a) it is not certain that the contingent event will continue during the 20-year revenue period as this policy is currently the subject of consultation by the Department for Business, Energy and Industrial Strategy (BEIS);
 - (b) there are uncertain costs and/or expenses (as the case may be) which cannot be forecast and which may be incurred by the Potential Licensee as a result of the contingent event; and
 - (c) it is likely that if the contingent events do arise they would have a material impact on the costs and/or expenses (as the case may be) incurred by the Potential Licensee.

We consider that a CEA is appropriate in these circumstances as all bidders at the ITT stage were provided with the policy existing at the ITT stage to base their submissions on and therefore did not factor in the implications of potential changes to the payment of VAT and/or the disallowance of scrap value under the decommissioning plan. It is unclear what permanent changes will be made to BEIS' policy on decommissioning reserves; if any, and hence it is not yet clear the extent to which the Potential Licensee may be impacted. We will keep this situation under review in relation to existing licensees.

The CEA allows us the flexibility to respond appropriately as BEIS' policy on decommissioning reserves evolves.

Tender revenue stream

Amended standard condition E12-J2 (Restriction of Transmission Revenue: Revenue from Transmission Owner Services) sets out the proposed tender revenue stream for the Project for the purposes of the section 8A consultation (the **s8A TRS**). The s8A TRS is based on the tender revenue stream bid by the Preferred Bidder at the ITT stage of the tender process, which has been updated as appropriate to reflect further information available to the Preferred Bidder since the date of the ITT submission, including the draft final transfer value for the Project. The s8A TRS assumes that 100% of the draft final transfer value will be paid to the project developer on asset transfer. Details of the transfer value which is reflected in the s8A TRS are set out in the draft cost assessment report for the Project, which is published on our website today (www.ofgem.gov.uk).

If you have any queries regarding the information contained within this letter you should contact Louise Murray on 020 7901 7278 or by email to offshorelicensing@ofgem.gov.uk

Yours sincerely,

**Cathryn Scott,
Director, Networks**
