

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Optimise Prime

Tick if this answer has been provided verbally: ☐

Project code	UKPNEN03	Question Number	Q15
Question date	30/08/2018	Answer date	03/09/2018
Submission section question relates to	Section 9		
Topic	Deliverables		
Question	Please explain how deliverable D7 goes beyond the standard Knowledge Dissemination Requirements described in the Governance Document that are covered by the generic project deliverable. In this instance specifically the requirements for a Close Down Report.		
Notes on question			
Answer	<p>Deliverable D7 will include detailed information about all the learning points from Optimise Prime and it is not limited to learning applicable to Network Licensees or learning outcomes demonstrating performance against the original aims and objectives.</p> <p>As there are systems and technology within Optimise Prime implemented by third parties (i.e. not Network Licensees), the report will be providing sufficient information for all the infrastructure and technology trialled and developed within the project to allow their wider post-project implementation.</p> <p>The deliverable will include a number of insights and recommendations to the wider EV industry, including other Network Licensees, our External Supporters and other fleet operators.</p> <p>In contrast, the Close Down report includes just a summary of all the learning from all stages of the project as well as reporting on the performance of the project against its original objectives and criteria. We will update Table 10 in Section 9 of the Full Submission document to make the added value of D7 clearer. We will also list deliverable D7 as one of the "Key Project learning documents" in the Close Down report to ensure people refer to it for additional learning.</p>
