

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Charge: Rfuelling Tomorrow's Electrified Transport

Tick if this answer has been provided verbally: ☐

Project code	SPMV1	Question Number	24
Question date	23/08/18	Answer date	28/08/18
Submission section question relates to		N/A	
Topic	b) Value for money		
Question	What is SGS scope of equipment supply for this project and is that reflected in their costs shown in the proposal?		
Notes on question			
Answer	<p>All project partners have committed significant resources to the development of the proposal in addition to committing continued benefit in kind support if successful. With regards to SGS, the scope of equipment supply is servers to run the software application and the provision of grid edge devices.</p> <p>Equipment costs are included in the proposal costs and outlined in the cost spreadsheet. The hardware costs make up ~5% of the funding requested, and will reduce further where possible with third party aggregators to communicate with charge posts.</p> <p>The number of ANM Element/grid edge devices will depend on the number of large assets to be controlled e.g. individual DER devices. The modular design of the project lowers overall risk, and ensure that value for money can be delivered.</p>
