Project code	SPMV1	Question Number	12
Question date	21/08/18	Answer date	23/08/18
Submission section question relates to		N/A	
Topic	n/a		
Question	P9 Please clarify what the "management platform" refers to.		
Notes on question			
Answer	<p>The management platform refers to an Active Network Management platform, with the ability to manage load flows in real time. This product is currently used in SPEN distribution network (and 3 other DNO networks across GB) to manage distributed generation connected in constrained areas of the network. In this trial, we wish to demonstrate the ability of the platform to manage other resources such as EV charging posts and co-ordinate the charging with management of other load and generation in the network area. There are a number of additional technical/commercial considerations in understanding the complexities of these assets working together and the bounds that they must operate</p>
