

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Charge: Refuelling Tomorrow's Electrified Transport

Tick if this answer has been provided verbally: ☐

Project code	SPMV1	Question Number	55
Question date	27/09/18	Answer date	02/10/18
Submission section question relates to		N/A	
Topic			
Question	Please explain how and why the expected carbon benefit of a 1 year acceleration of uptake of EVs has been attributed to each of the three methods. Please also confirm that the "scaling" referred to on page 19 but not mentioned in the detailed methodology (pp 56-57) has been included in the estimates shown on pages 48 and 57.		
Notes on question			
Answer	<ul style="list-style-type: none">• The 1 year acceleration has been attributed to the whole project and not individual methods.• The scaling referred to on page 19 has been included within the figures provided in table 11 & table 18
