Deployment Update

This table shows the capacity deployed and number of installations accredited per deployment band in Tariff Period 1 (01 January – 31 March) 2019.

Please note that due to the unavailability of data from the MCS database we are unable to publish figures for tariff bands containing MCS-scale installations (PV <=10kW, PV 10-50kW, PV Standalone, Wind <50kW, and Micro-CHP). We aim to publish the full data as usual on Friday 25th January.

*The data for micro-CHP corresponds to the tariff period 01 October 2018 – 31 March 2019

Please be aware that the above table is a snapshot of deployment and does not consist of real-time data. The information for each tariff period is verified once the tariff period has ended, which means these figures may change when the quarterly report is published.
