Feed-in Tariff Deployment Caps Quarterly Report (Tariff Period 1 2019)

Table 1: Capacity deployed by tariff band

Table 1 (below) shows the capacity deployed per technology and capacity band in the tariff period 01 January – March 2019, which has now closed.

Table 1 - End of Tariff Period - Deployment Table								
Deployment band	Cap limit (kW)	Capacity deployed (kW) ¹	Cap Reached?	Unused capacity (kW)	Date/time of final installation to qualify for cap	Total no of Installations	Full ROOFIT Applications	Preliminary ROOFIT Applications
PV <10kW	423,608	76,175	No	347,433	N/A	23,106	N/A	N/A

* For the purposes of this table, "capacity deployed" includes the capacity of MCS installations and ROOFIT applications for preliminary and full accreditation that have been counted towards the relevant cap in the tariff period.

Chart 1: Deployment caps utilisation (by technology type)

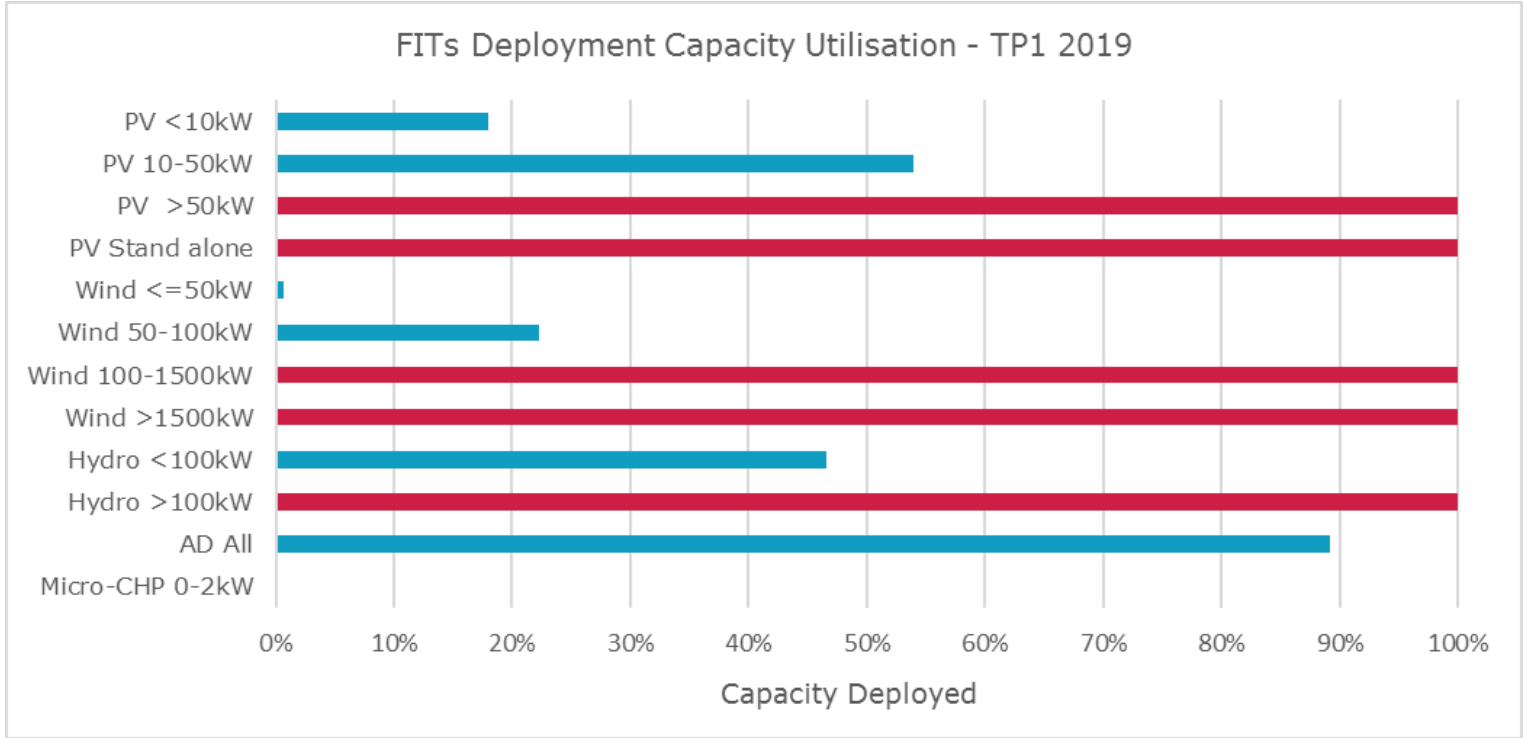

Chart 2: Queued capacity at the end of TP1

This chart provides an indication of the queued capacity under each cap based on the deployment figures currently available. This information is an indicative estimate only.
